

## STATEMENT OF WORK

### BACKGROUND:

The Defense Energy Support Center's (DESC) mission is to provide the Department of Defense and other government agencies with comprehensive energy solutions in the most effective and economical manner possible. As the Executive Agent for Bulk Petroleum, DESC is responsible for all Bulk Petroleum supply management from source of supply to the point of customer acceptance, with an emphasis on improving wartime effectiveness and peacetime efficiency. DESC also procures commercial grade petroleum products, natural gas, electricity, alternative fuels, coal, and missile fuels. DESC anticipates that advisory and assistance services will be required to assist in the completion of this mission.

### SCOPE OF WORK:

It is anticipated that multiple indefinite-delivery contracts will be awarded, with task orders competed among these contractors. The individual task orders will contain the specific statement of work required for that task. Task orders may be fixed price, time and material, labor hour, or any combination of these types.

The projected work will fall into three categories management support services, analyses/studies support, and application of new technology to fuels and energy. Consulting services may include any aspect of DESC's current or future mission. Services from the three categories may be required in any of DESC's business offices or regional office. DESC's organizational chart is available at <http://www.desc.dla.mil/Static/DESCOrganizationChart.asp>

Management support services may require contractor personnel to work in DESC provided workspace for the time that the services are required. The individual task orders will specify if work space is provided and the location of the work space. The individual task orders will also specify if government furnished equipment such as computers will be provided.

Note: Any individuals nominated to work under an individual task order must have the ability to pass a background investigation to obtain a government building pass and obtain a Common Access Card (CAC) for access to government computer systems. The government will not reimburse a contractor for individuals that do not meet this requirement. Contractors using government furnished equipment are subject to the same terms and conditions of use as government employees.
