THE SOLICITATION CLOSING DATE OF THURSDAY, OCTOBER 10TH, 2013; 4:00 P.M., CENTRAL DAYLIGHT TIME (CDT), REMAINS UNCHANGED

The purpose of this Amendment is to provide recent questions and clarify how the annual value is calculated for a stand-alone project that is 100% complete with less than 1 year of performance. Additionally, we are providing clarification regarding submission of questions and the date of the anticipated last amendment.

Since there are only 4 blocks for amendment acknowledgement on the SF 33 form itself, GSA will accept the amendment acknowledgement on the SF33 if you type or manually write “Amendments 01 through 06” and date it the date of this last amendment “09/26/2013” in only one of the blocks in Block 14 of the form.

Please wait until the final amendment is issued prior to filling out the SF 33. GSA does not intend to issue any more amendments to the solicitation documents themselves (Section A through M), including the attachments in Section J, since all the Questions and Responses are binding; however, GSA may post additional amendments in the form of Questions and Responses only if they could potentially impact the preparation of proposals in response to the solicitation. Comments, recommendations, and other feedback received have been considered, but are not included.

If further questions are received that need to be shared in accordance with regulation, GSA will issue a final amendment on October 3, 2013. No questions will be answered beyond October 2, 2013. All Offerors are strongly encouraged to submit any remaining question regarding proposal preparation by October 2, 2013.

1. Question: In the most recent solicitation document Section L.5.3.1. states “Annual project value for completed projects is determined as follows: total obligated dollars divided by the total number of months of performance multiplied by 12.” In Amendment 1 question 134, the response further states the formula provided should be used to calculate a task order with a length less than 12 months. A response to Question: #33 under Amendment 05 (OASIS) and Amendment 06 (OASIS SB) appears to contradict the solicitation and previous guidance on how to calculate a contract value. Can you please confirm the formula provided in the solicitation should be used in calculating the Annual Project Value for section L.5.3.1?

Response: The answer provided to Question 134 of Amendment 01 was originally a follow on question concerning a “collection of task orders” under a Single-Award IDIQ or BPA. We felt the value of “stand-alone” completed projects with less than 1 Year of performance was self-evident and did not need to be addressed. However, through the sorting process, the follow on question in the previous Amendment got separated from the question it was originally submitted with. We do see how the response (as a stand-alone question) could have been misinterpreted and as a result, GSA will honor the “annualized” value of a stand-alone project that is completed with less than 1 Year of performance in accordance with the formula in Section L.5.3.1. (i.e., total obligated dollars divided by the total number of months of performance multiplied by 12). Please note that any “stand-alone” project submitted with less than 1 year of performance must be 100% complete in order to determine the total value in this manner. That means no options to be exercised and not ongoing. This will be strictly enforced. (See Question and Response #14 under Amendment 05 (OASIS) or Amendment 06 (OASIS SB)). For additional clarity, for any task order submitted that is 100% complete with less than 1 Year of performance as a “collection of task orders” under a Single-Award IDIQ or BPA, the formula for calculating total annual value remains unchanged. (See Question and Response #94 under Amendment 02 (OASIS) or Amendment 03 (OASIS SB).

The corrected response to Question: #33 under Amendment 05 (OASIS) and Amendment 06 (OASIS SB) is as follows:
**Question**: Will the annualized total contract value of a completed task order with a period of performance less than one year equal the total contract value for the task order? Example: 6 month task order for $5 million has an annualized total contract value of $5 million. Is this correct?

**Response**: The value of the project shall be computed in accordance with the formula presented in Section L.5.3.1. For your example, the "annualized" value of that project is $10 Million.

2. **Question**: A Relevant Experience (Primary) Project must meet Section L.5.3.1 criteria including timeliness (on-going or completed between September 16, 2008 and October 9, 2013.) If the Offeror had ownership and control of an SBA approved, Mentor/Protégé Joint Venture established for the pursuit and execution of a project that meets the timeliness criteria but that terminated when the project was completed and submits a Meaningful Relationship Commitment Letter clearly articulating how the former M/P JV member(s) will be utilized in the performance of task orders under OASIS SB, can this project be included and evaluated?

**Response**: Meaningful relationships need to come from the entity who performed the work. If the JV was still in existence, you could use the project. As presented, however, the answer is no.

3. **Question**: Our company is in the final stages of production and would like to send out our proposal this week, but before we do we’d like to know if you foresee any further amendments to this solicitation?

**Response**: If there are any additional questions between now and then, we anticipate issuing the final Q&A as an Amendment on October 3. This will provide a full week for the sending of proposals. Please do not send your proposal prior to October 3.
